

Finished Project

Home Page

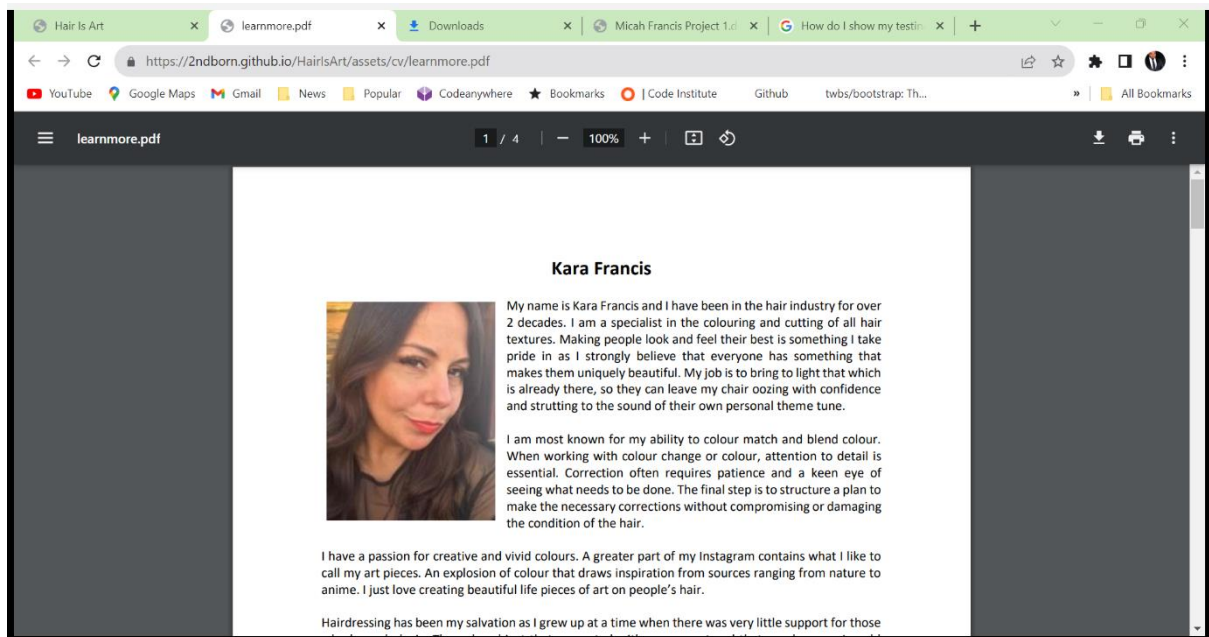

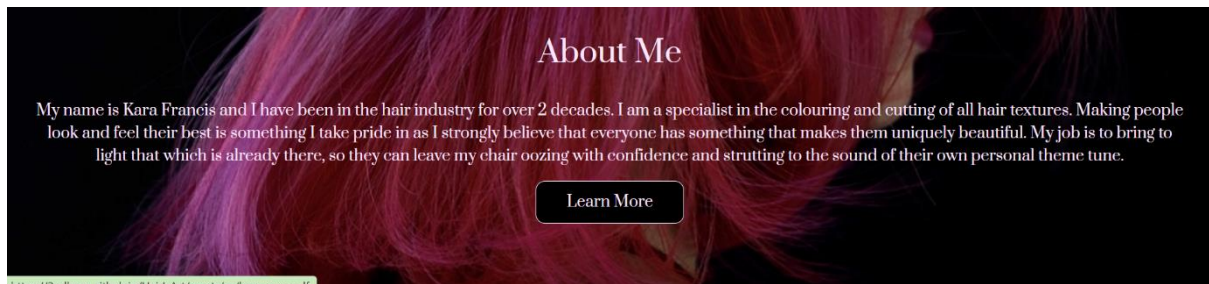

When the user enters the Home page, they will see an inviting hero image that shows the logo “Hair Is Art” and the navigation bar that shows the 4 options Home, Gallery, Contact and Download. The navigation bar is a consistent feature across all the pages on the website. Clicking on the logo takes the user back to the home page or refreshes the page if you are already on the home page. Hero image was taken and provided by Kara Francis.

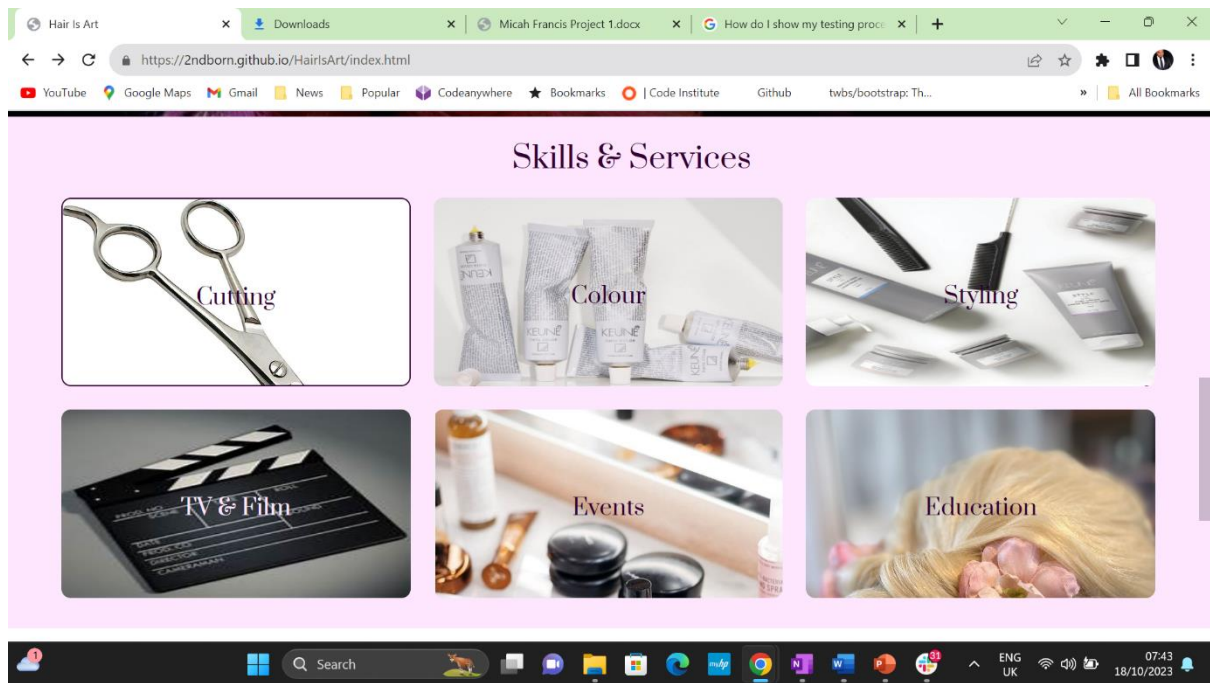

Scrolling further down the page the user will see more of the hero image coupled with the “About Me” section which is on an opaque background with an introductory bio in white writing. There is also a white button that invites the user to learn more about the owner of the site.

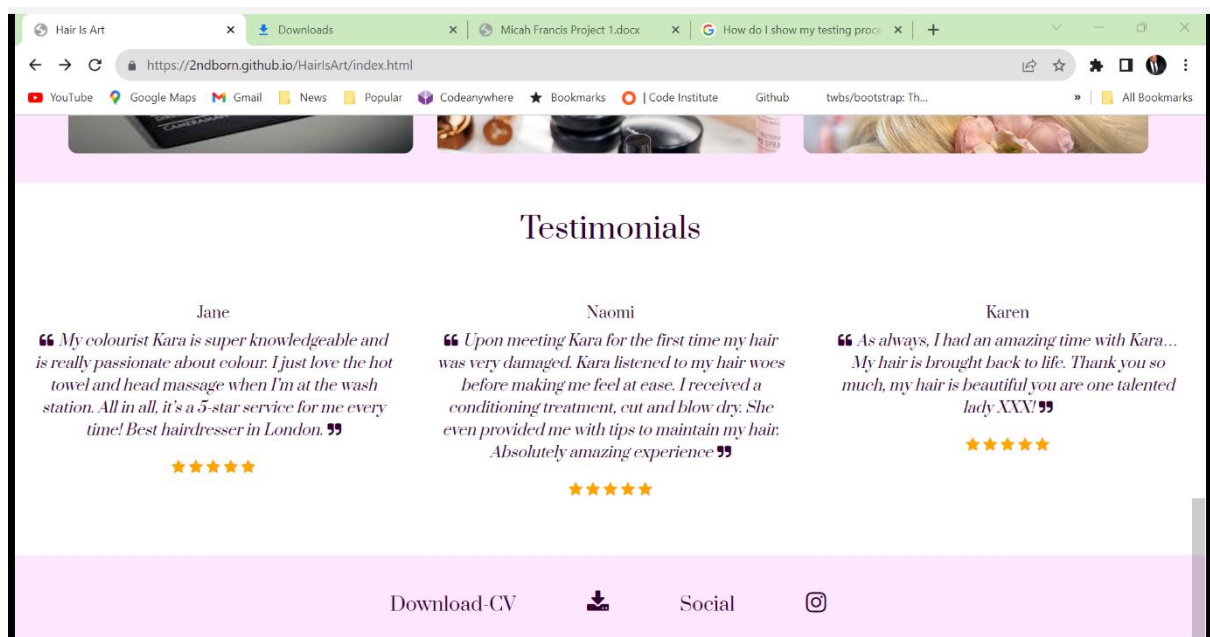

Hovering over the learn more button changes the colour to alert the user that the button is interactive. Clicking on the button creates a new tab where the user can read a bio of the owner. Bio was provided by Kara Francis

Scrolling further down the page the user will come to the “Skills & Services” page. There are six panels that show the services that are provided by the owner. Hovering over each panel highlights them. In the future the user will be able to learn more about those services. Images for Cutting, Colour and styling were all provide by “Keune Cosmetic”. TV & film is from <https://juvale.com/products/b07bs7rq4m> and Events and Education were taken and provided by Kara Francis.

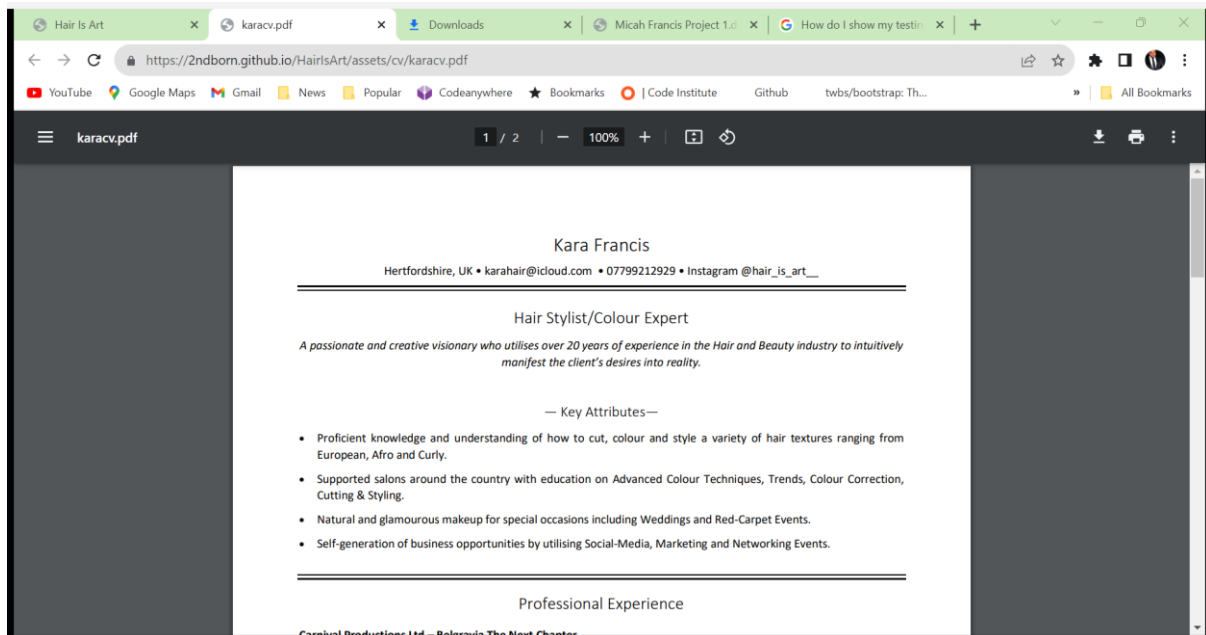

The final section is the “Testimonials” where the user can read endorsements from satisfied customers. To add value to the testimonial’s quotation marks and 5 yellow stars validate the comments. All testimonials are real customers and have been provided by Kara Francis

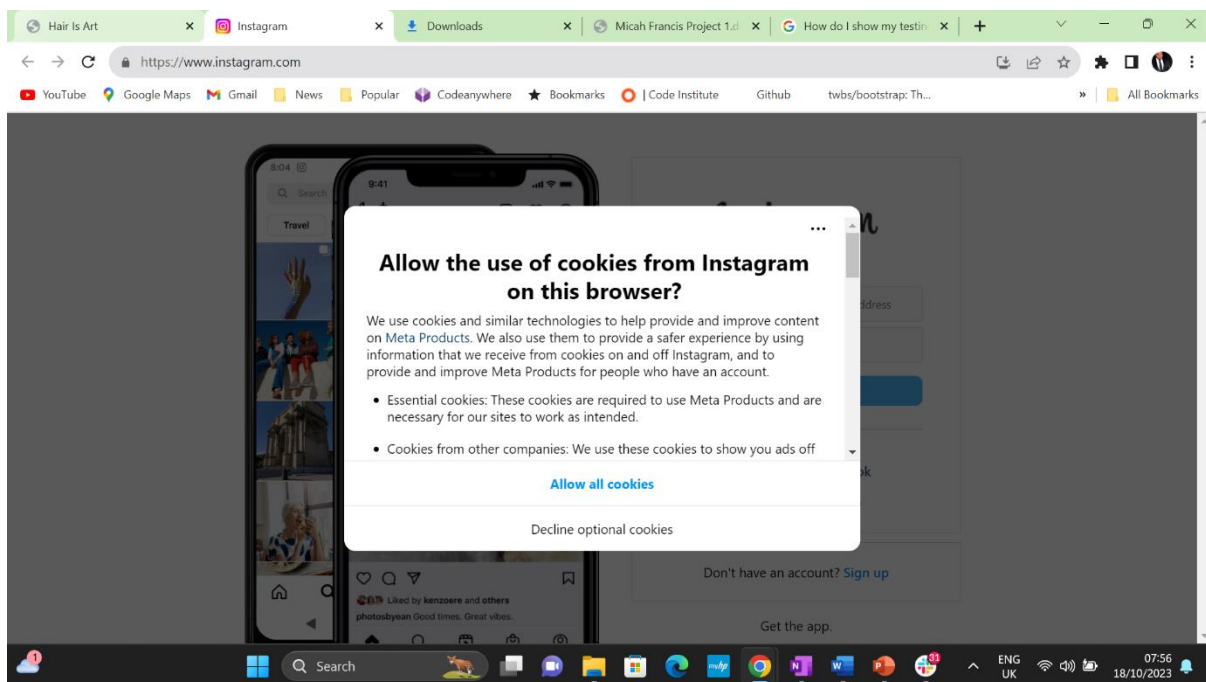

At the bottom of the page the user will see “Download-CV” with a download icon and “Social” with an Instagram icon. This feature is consistent amongst the pages of the website. Clicking on the

download icon opens a new tab where the user can view the owners CV. CV was supplied by Kara Francis

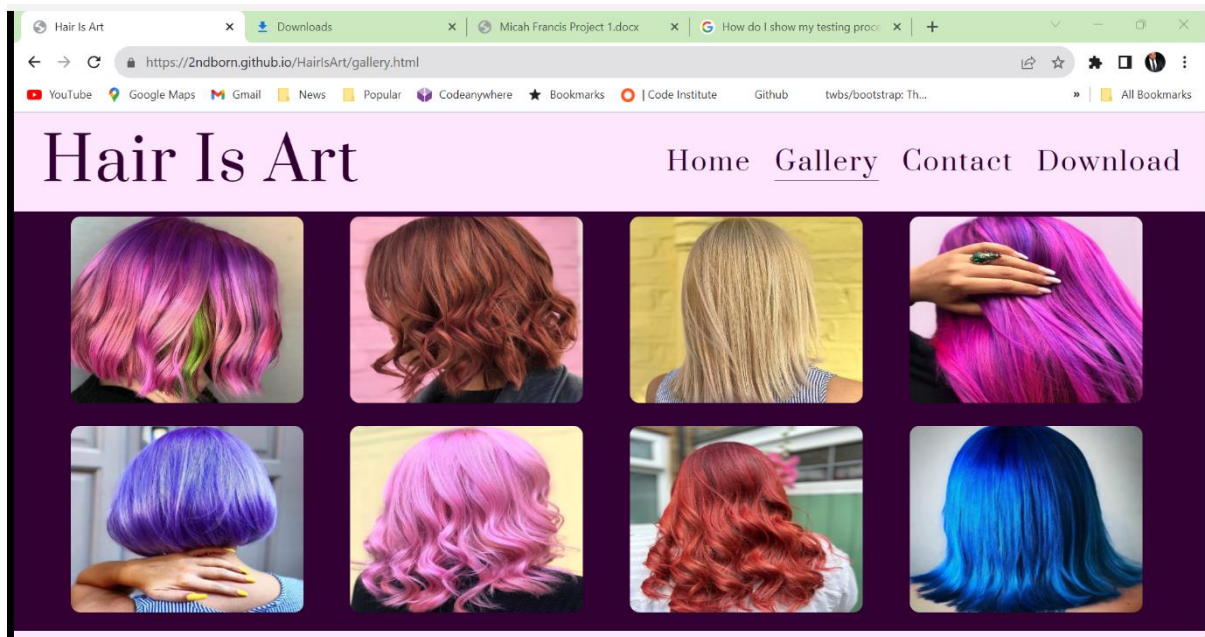

Clicking on the Instagram Icon opens a tab to Instagram.

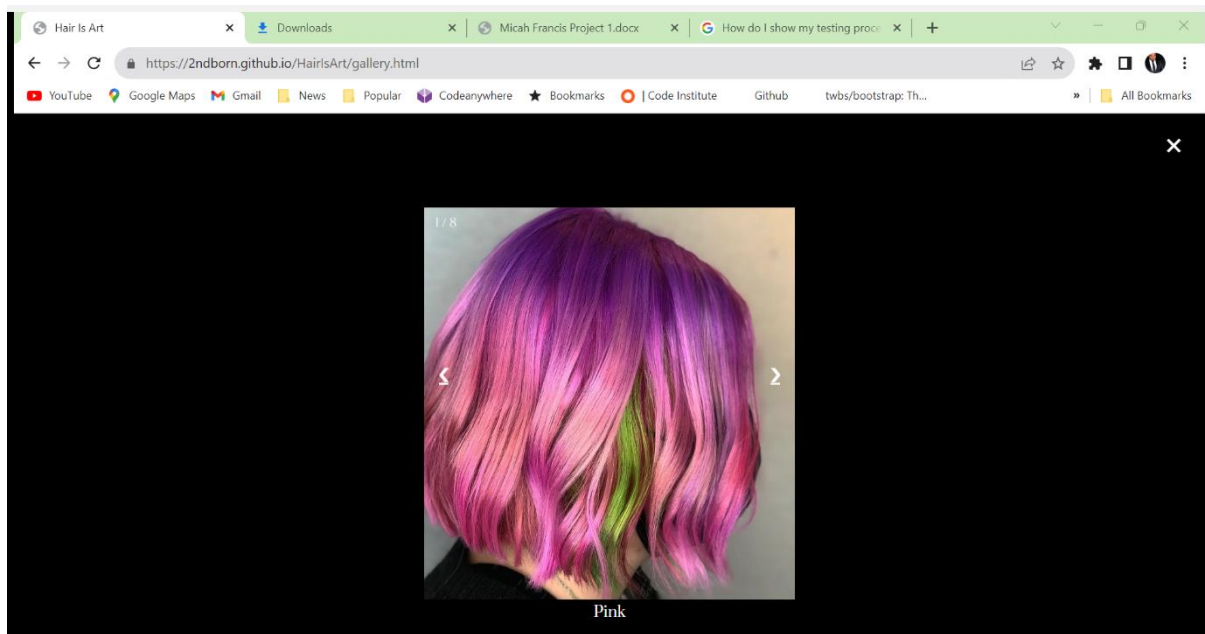

Gallery

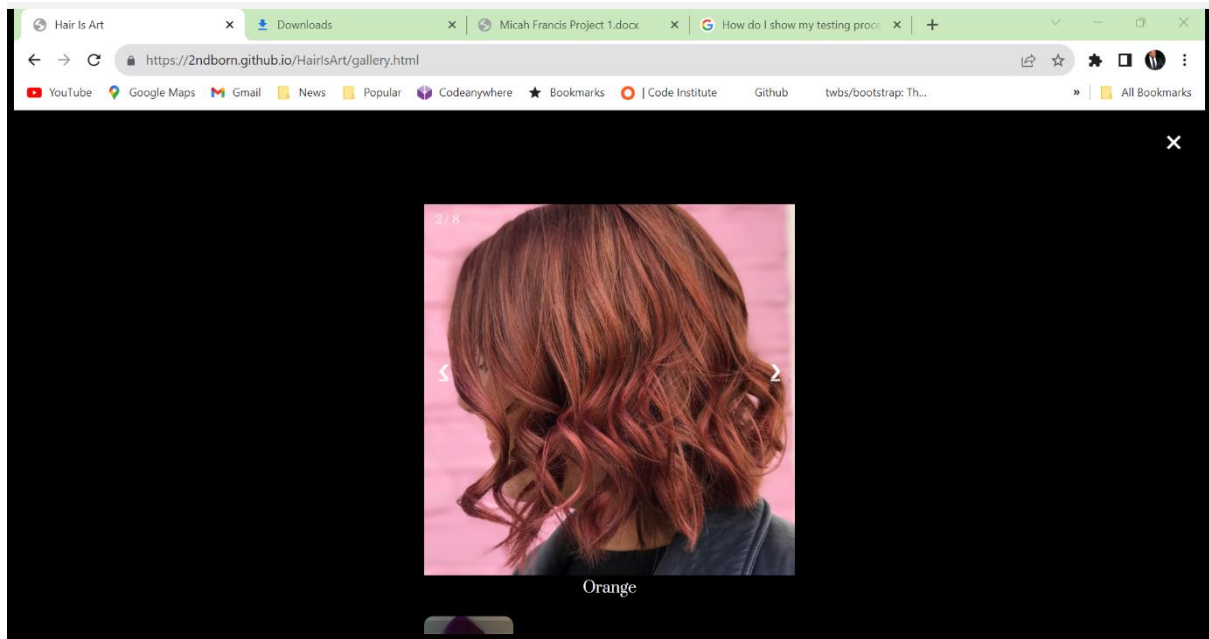

The user will see the logo and navigation bar. There is a line under “Gallery” to show the user what page they are on. There are eight panels placed on top of a purple background. On the panels are images that showcase the owner’s best works. All pictures/videos were taken and supplied by Kara Francis. https://www.w3schools.com/howto/howto_js_lightbox.asp was used to create the slideshow pop up.

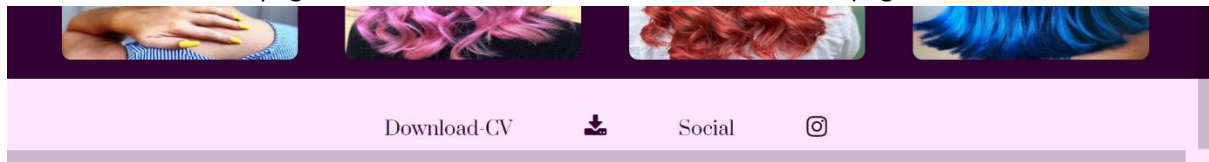

If the user clicks on any one of the panels, it will trigger a pop-up slideshow so the user can view the pictures in a larger format.

The slideshow has arrows either side of the picture to encourage the user to view another picture. Underneath each picture is a caption highlighting the colour of the hair.

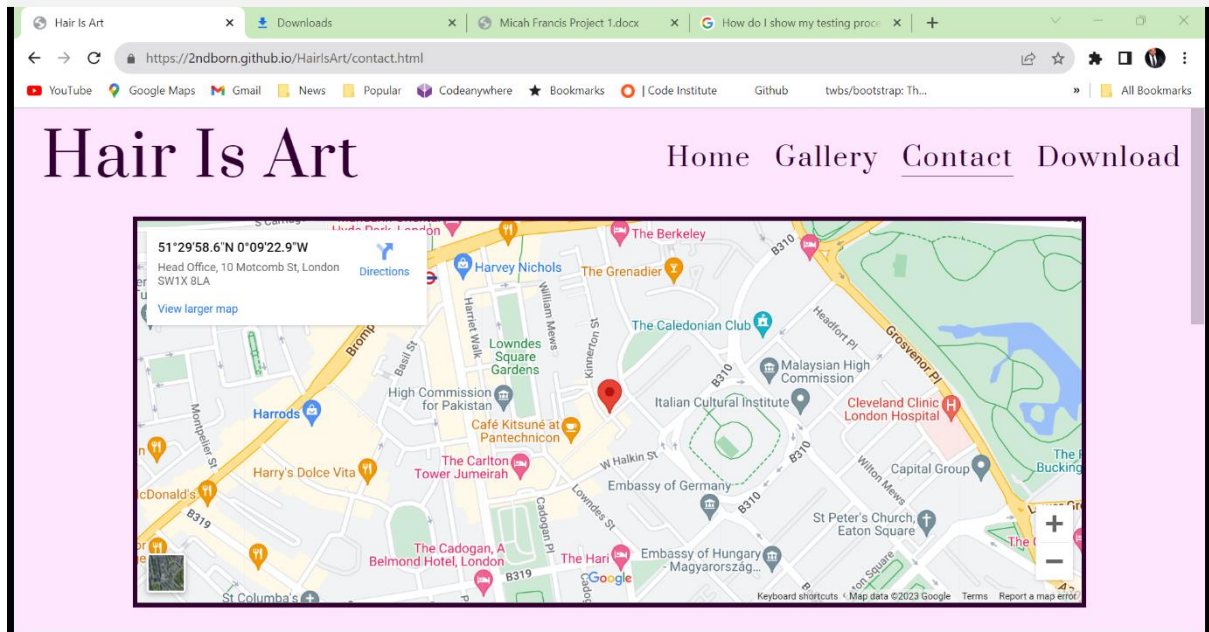

At the bottom of the page is the footer which is the same as the home page.

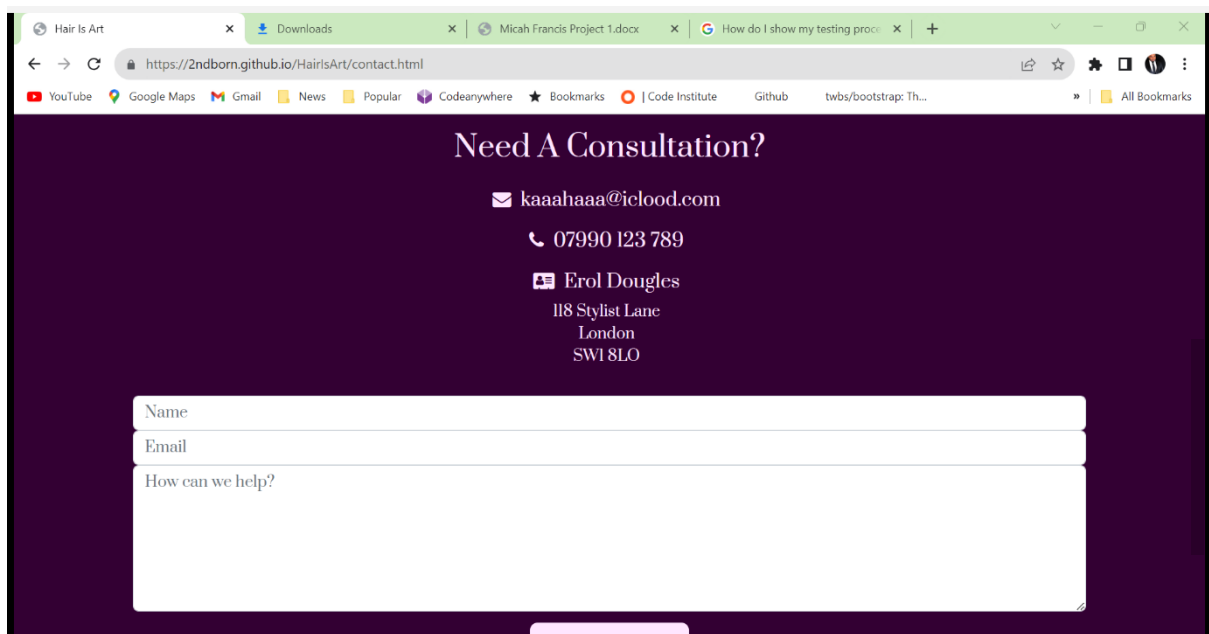

Contact Page

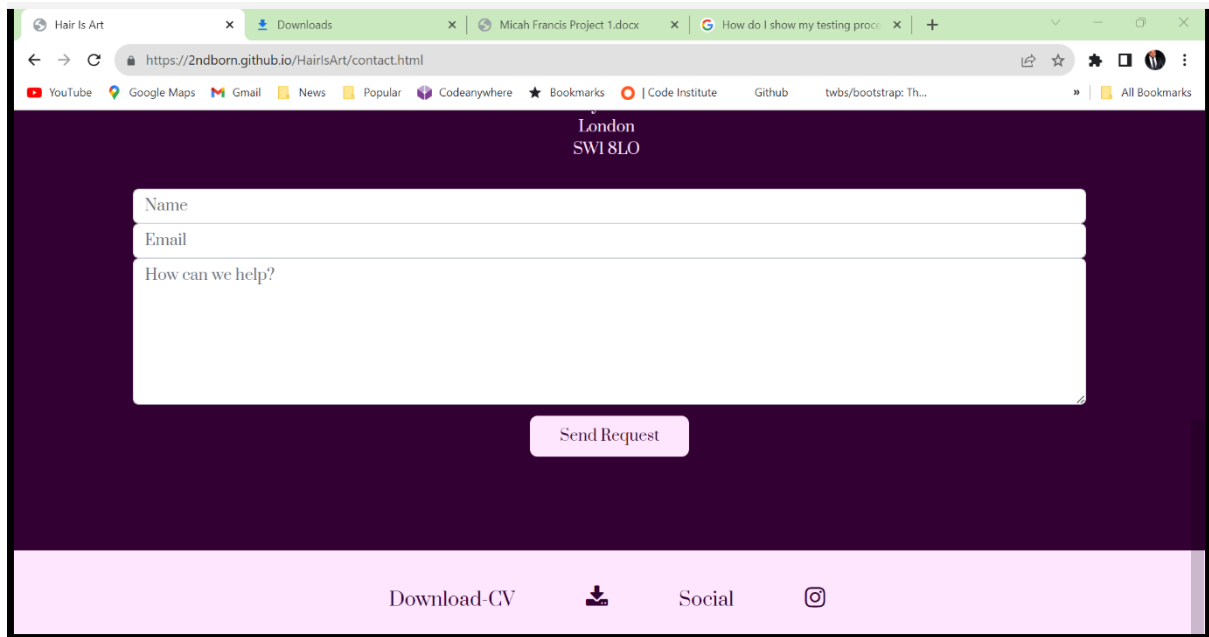

The user will see the logo and navigation bar. There is a line under “Contact” to show the user what page they are on. The user will also see a Google map which shows where the owner can be found. I used the Google maps API to upload the map.

Scrolling further down the page poses a question to the user “Need A Consultation?” Below is the owner Email, Phone Number and Business address.

Underneath the owners contain details the user will see a contact form to be completed by the user so they can set up a consultation or ask the owner a question. Beneath the form is the “Send Request” button. Bootstraps form control class for used for the form.

The footer is the same as the other pages.
